

Hands-Free Control. Real-Time Insight.

The Nexus AR-Enabled Glasses and Wrist Interface

With real-time display, easy navigation, and seamless connection to inspection systems, these wearable tools let inspectors work smarter and safer in even the most challenging environments.

No more juggling equipment or working blind in tight spaces. Inspectors can keep their focus on the job, make faster adjustments, and capture data as they go, boosting both accuracy and efficiency.

put inspection control and data visualization right where inspectors need it hands-free.

KEY ADVANTAGES:

- Hands-free operation and real-time visualization
- Reduces physical strain and simplifies inspections
- Improves accuracy and speed of data capture
- Enhances safety and awareness in tight or hazardous spaces
